

ISC2 CISSP (CERTIFIED INFORMATION SYSTEMS SECURITY PROFESSIONAL)

32 HOURS > INSTRUCTOR-LED TRAINING > EXPERT > ENGLISH/URDU

Course Overview

The Certified Information Systems Security Professional (CISSP) course is a perfect companion for preparing for the CISSP exam. It focuses specifically on the objectives introduced by (ISC)² in April 2024, covering asset retention, secure provisioning, crypto attacks, machine learning tools, threat hunting, risk-based access control, zero trust, SAML, SOAR, CASB, securing microservices, containers, managed services, and many other topics while helping you identify areas of weakness and improve both your conceptual knowledge and hands-on skills.

The goal of this course is to give you all the tools you need to pass the CISSP exam on your first try, including preparation hints, test-taking tips, time-saving strategies, self-assessment questions, and practice exams.

Job role

- Information Security Analyst, Security Systems Engineer, Information Security Manager, Security Architect, Chief Information Security Officer, Risk and Compliance Director
