

CISCO CERTIFIED NETWORK ASSOCIATE **CCNA (200-301 V1.1)**

120-150 CREDIT HOURS > INSTRUCTOR-LED TRAINING > FOUNDATIONAL > ENGLISH/URDU

Course Overview

Cisco is a world leader in IT, networking, and security solutions. Achieving the Cisco Certified Network Associate Certification (CCNA) is a valuable first step toward a career in IT. To gain CCNA certification, you must pass an exam that covers a wide range of fundamentals and knowledge bases including the latest networking technologies, software development skills, and job roles. CCNA certification gives you the foundation to build the career you want.

The goal of this course is to provide you with all the tools you need to prepare for the CCNA (200-301) exam including text explanations, video demos, lab activities, self-assessment questions, and a practice exam to increase your chances of passing on your first try.
